

# Tourism Saskatchewan launches Clean It Right training for tourism, hospitality, and retail businesses

Clean it Right is a convenient online training tool to help businesses reduce the spread of COVID-19 and regain consumer confidence. The training enhances existing cleaning practices by helping employees understand the significance of cleaning and disinfection procedures and demonstrating a commitment to provide employees and customers alike with a clean and safe environment.

Businesses can choose from among three modules:

- Clean It Right for Hotels, Motels and Bed & Breakfasts (includes a restaurant / food services section for full-service businesses)
- Clean It Right for Restaurants and Food Services
- Clean It Right for Retail Businesses (includes a restaurant / food services section for full-service businesses)

Businesses who train all cleaning staff receive a Clean it Right window decal and electronic logo to reassure the public of a clean and safe environment.

Clean It Right was developed by the Manitoba Tourism Education Council (MTEC) adapted by six other provinces, including Saskatchewan.

Clean it Right is supported and endorsed by the Retail Council of Canada, Saskatchewan Chamber of Commerce, Saskatchewan Hotel and Hospitality Association, Service Hospitality and Tourism HR Canada.
